

Event Viewer Web

Access it from any web browser by typing the address → [IP/eventviewer](#)

- IP = IP address of server machine where Event Viewer Web is installed
 - example 1: [192.168.1.2/eventviewer](#) (*default port*)
 - example 2: [10.254.254.105:8080/eventviewer](#) (*custom port*)

The screenshot shows the Polkadots Event Viewer Web interface. The top navigation bar includes the Polkadots logo and the text 'Event Viewer Web'. On the right side of the navigation bar, there is a 'Settings' link circled in orange. Below the navigation bar, there is a search section with a search bar and filters. A 'Reset all filters' button is circled in orange. The main content area displays a table of event logs. The table has columns for Date, Computer, Workflow, Filename, Author, and Job. A row is highlighted in blue, and an information icon (i) is circled in orange. A 'Configure Settings' link is also circled in orange. A 'Detailed event info' box is shown below the table, pointing to the information icon.

Date	Computer	Workflow	Filename	Author	Job
02/03/2012 15:01:01	LAB2003-R2	PAIRS	6-SU1-022412_Back_Color.ps	Impose-it	SU1-022412
02/03/2012 14:59:39	LAB2003-R2	PAIRS	5-SU1-022412_Front_Color.ps	Impose-it	SU1-022412
02/03/2012 14:58:43	LAB2003-R2	LB_PAIRS	6-SU1-022412_Back_Color.ps	Impose-it	SU1-022412
02/03/2012 14:58:14	LAB2003-R2	PAIRS	4-SU1-022412_Back_Color.ps	Impose-it	SU1-022412
02/03/2012 14:57:21	LAB2003-R2	LB_PAIRS	5-SU1-022412_Front_Color.ps	Impose-it	SU1-022412

Event Viewer Web

- a centralized, web-based application
- displays real-time event logs from several Polkadots modules and multiple servers, including:
 - PrePage-it
 - Move-it
 - Load Balancing

*Note: Click the **Settings** link (shown in the figure above) to specify which Polkadots modules and servers should be displayed, as well as other configuration settings.*

- click the info icon **i** to see detailed (step-by-step), real-time information about each event, including Event Status → **✓** completed successfully | **🔄** in progress | **✖** error | **⚠** warning
- provides a wide range of search and filter capabilities – some examples are illustrated in the figure below

Polkadots Event Viewer Web

Search: file name contains : [input field] [magnifying glass icon]

Date: anytime Type: Any

Date	Computer	Workflow	Filename
02/03/2012 15:01:01	LAB2003-R2	PAIRS	6-SU1-0224
02/03/2012 14:59:39	LAB2003-R2	PAIRS	5-SU1-0224
02/03/2012 14:58:43	LAB2003-R2	LB_PAIRS	6-SU1-0224
02/03/2012 14:58:14	LAB2003-R2	PAIRS	4-SU1-0224

Search by **file name** or **job name**.
Filter by **Date** or workflow **Type**.

Click any column heading (e.g. **Date**, **Job Status**, **Application**, **Computer**, **Workflow**) to sort in ascending or descending order.

Click any filter icon and select your filter criteria.

filter by application

filter by job status

Filtering

Select keyword that will

- LoadBalance-it
- Move-it
- Prepage-it

Filtering

Select keyword that will

- Waiting
- InProgress
- Completed
- OnError
- OnWarning
